Matthew Lindeboom

Oakland, CA
matt@lindeboom.xyz

I help interdisciplinary teams develop awareness, overcome communication barriers, and continually adapt to uncertainty and complexity on a foundation of trust and real feedback.

I like to solve problems with Typescript/JS, Python, Ruby, HTML & CSS, and a little Rust. My favorite data stores are Postgres and DuckDB.

Experience

Founding Software Engineer, Head of Engineering

Kettle (Wildfire Insurance using Predictive AI)

October 2020 - May 2024

Player: I worked with Data Scientists and Quantitative Engineers to create prototypes, application workflows, and APIs that explored open questions and delivered results to internal stakeholders, clients and partners. Stack included React, Postgres + PostGIS, AWS Lambda & Django with CeleryMQ

Coach: Managed team of 11 software engineers and data scientists. Focussed on enabling staff engineers, coaching juniors, hiring and cultivating a high performing team & culture.

Engineering Manager

SurveyMonkey
Aug 2018 - Sep 2020

Managed multiple software teams of 5-6 engineers bringing new end-user products to market in Employee and Customer Feedback and Platform Growth Hacking.

Javascript (React) and Python
